WELCOME TO futureEV

STREAMLINING EV CHARGING SOLUTIONS FOR
LANDLORDS

Introduction

At FutureEV, we deliver end-to-end solutions for the installation, management, and maintenance of EV charging stations. Our goal is to help property owners add this modern and essential amenity to their spaces with ease.

The **Problem**

- One of the main challenges for electric mobility is the limited access to reliable charging points, which creates uncertainty for drivers.
- Many residential, commercial, and industrial spaces still lack sustainable and safe charging options, leaving a gap that needs to be addressed.

Our **Solution**

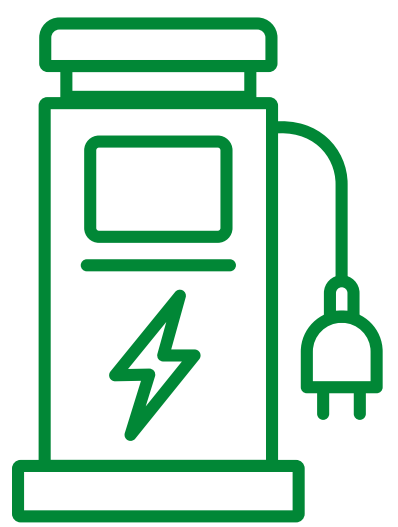

- We provide a comprehensive portfolio of solutions that combine reliable charging equipment, intuitive digital platforms, and flexible financial models, adapting to the unique characteristics and requirements of every property.

Commitment to **Sustainability**

- We work with the vision of a more sustainable future. Our solutions not only address today's demands but also contribute to environmental care and the development of responsible long-term mobility.

CUSTOMIZABLE EV CHARGING SOLUTIONS BY FUTUREEV

Hardware

Wide selection of reliable charging stations and equipment.

Software

Intuitive system to monitor, manage, and optimize charging points.

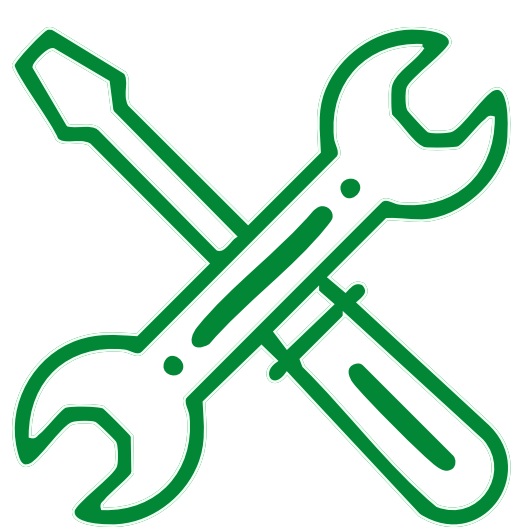

Installation

Professional installation services with full coverage.

Rebate Processing

Simple processing and management of rebates

Maintenance and Management

Comprehensive care for both equipment and software.

At FutureEV we give you the freedom to choose. Select our full suite of solutions or only the services your property requires.

EV CHARGING SOLUTIONS FOR EVERY PROPERTY TYPE

At FutureEV, we make EV charging station installation and management simple with our all-in-one, hassle-free service. With nationwide expertise, we adapt to the needs of a wide range of property types.

We Serve

Multifamily Residences

Adding value to residential communities with accessible and practical charging stations.

Medical Facilities

Charging solutions designed for hospitals, clinics, and care homes.

Commercial Spaces and Offices

Bringing electric mobility into modern business environments.

Retail Outlets

Providing charging access in malls, strip centers, and standalone shops.

Parking Lots

Expanding charging availability across both private and public parking facilities.

ECONOMIC FLEXIBILITY WITH FUTUREEV

We design flexible financial models for EV charging projects, adapting to the needs and investment capacity of each client.

Hybrid Solution

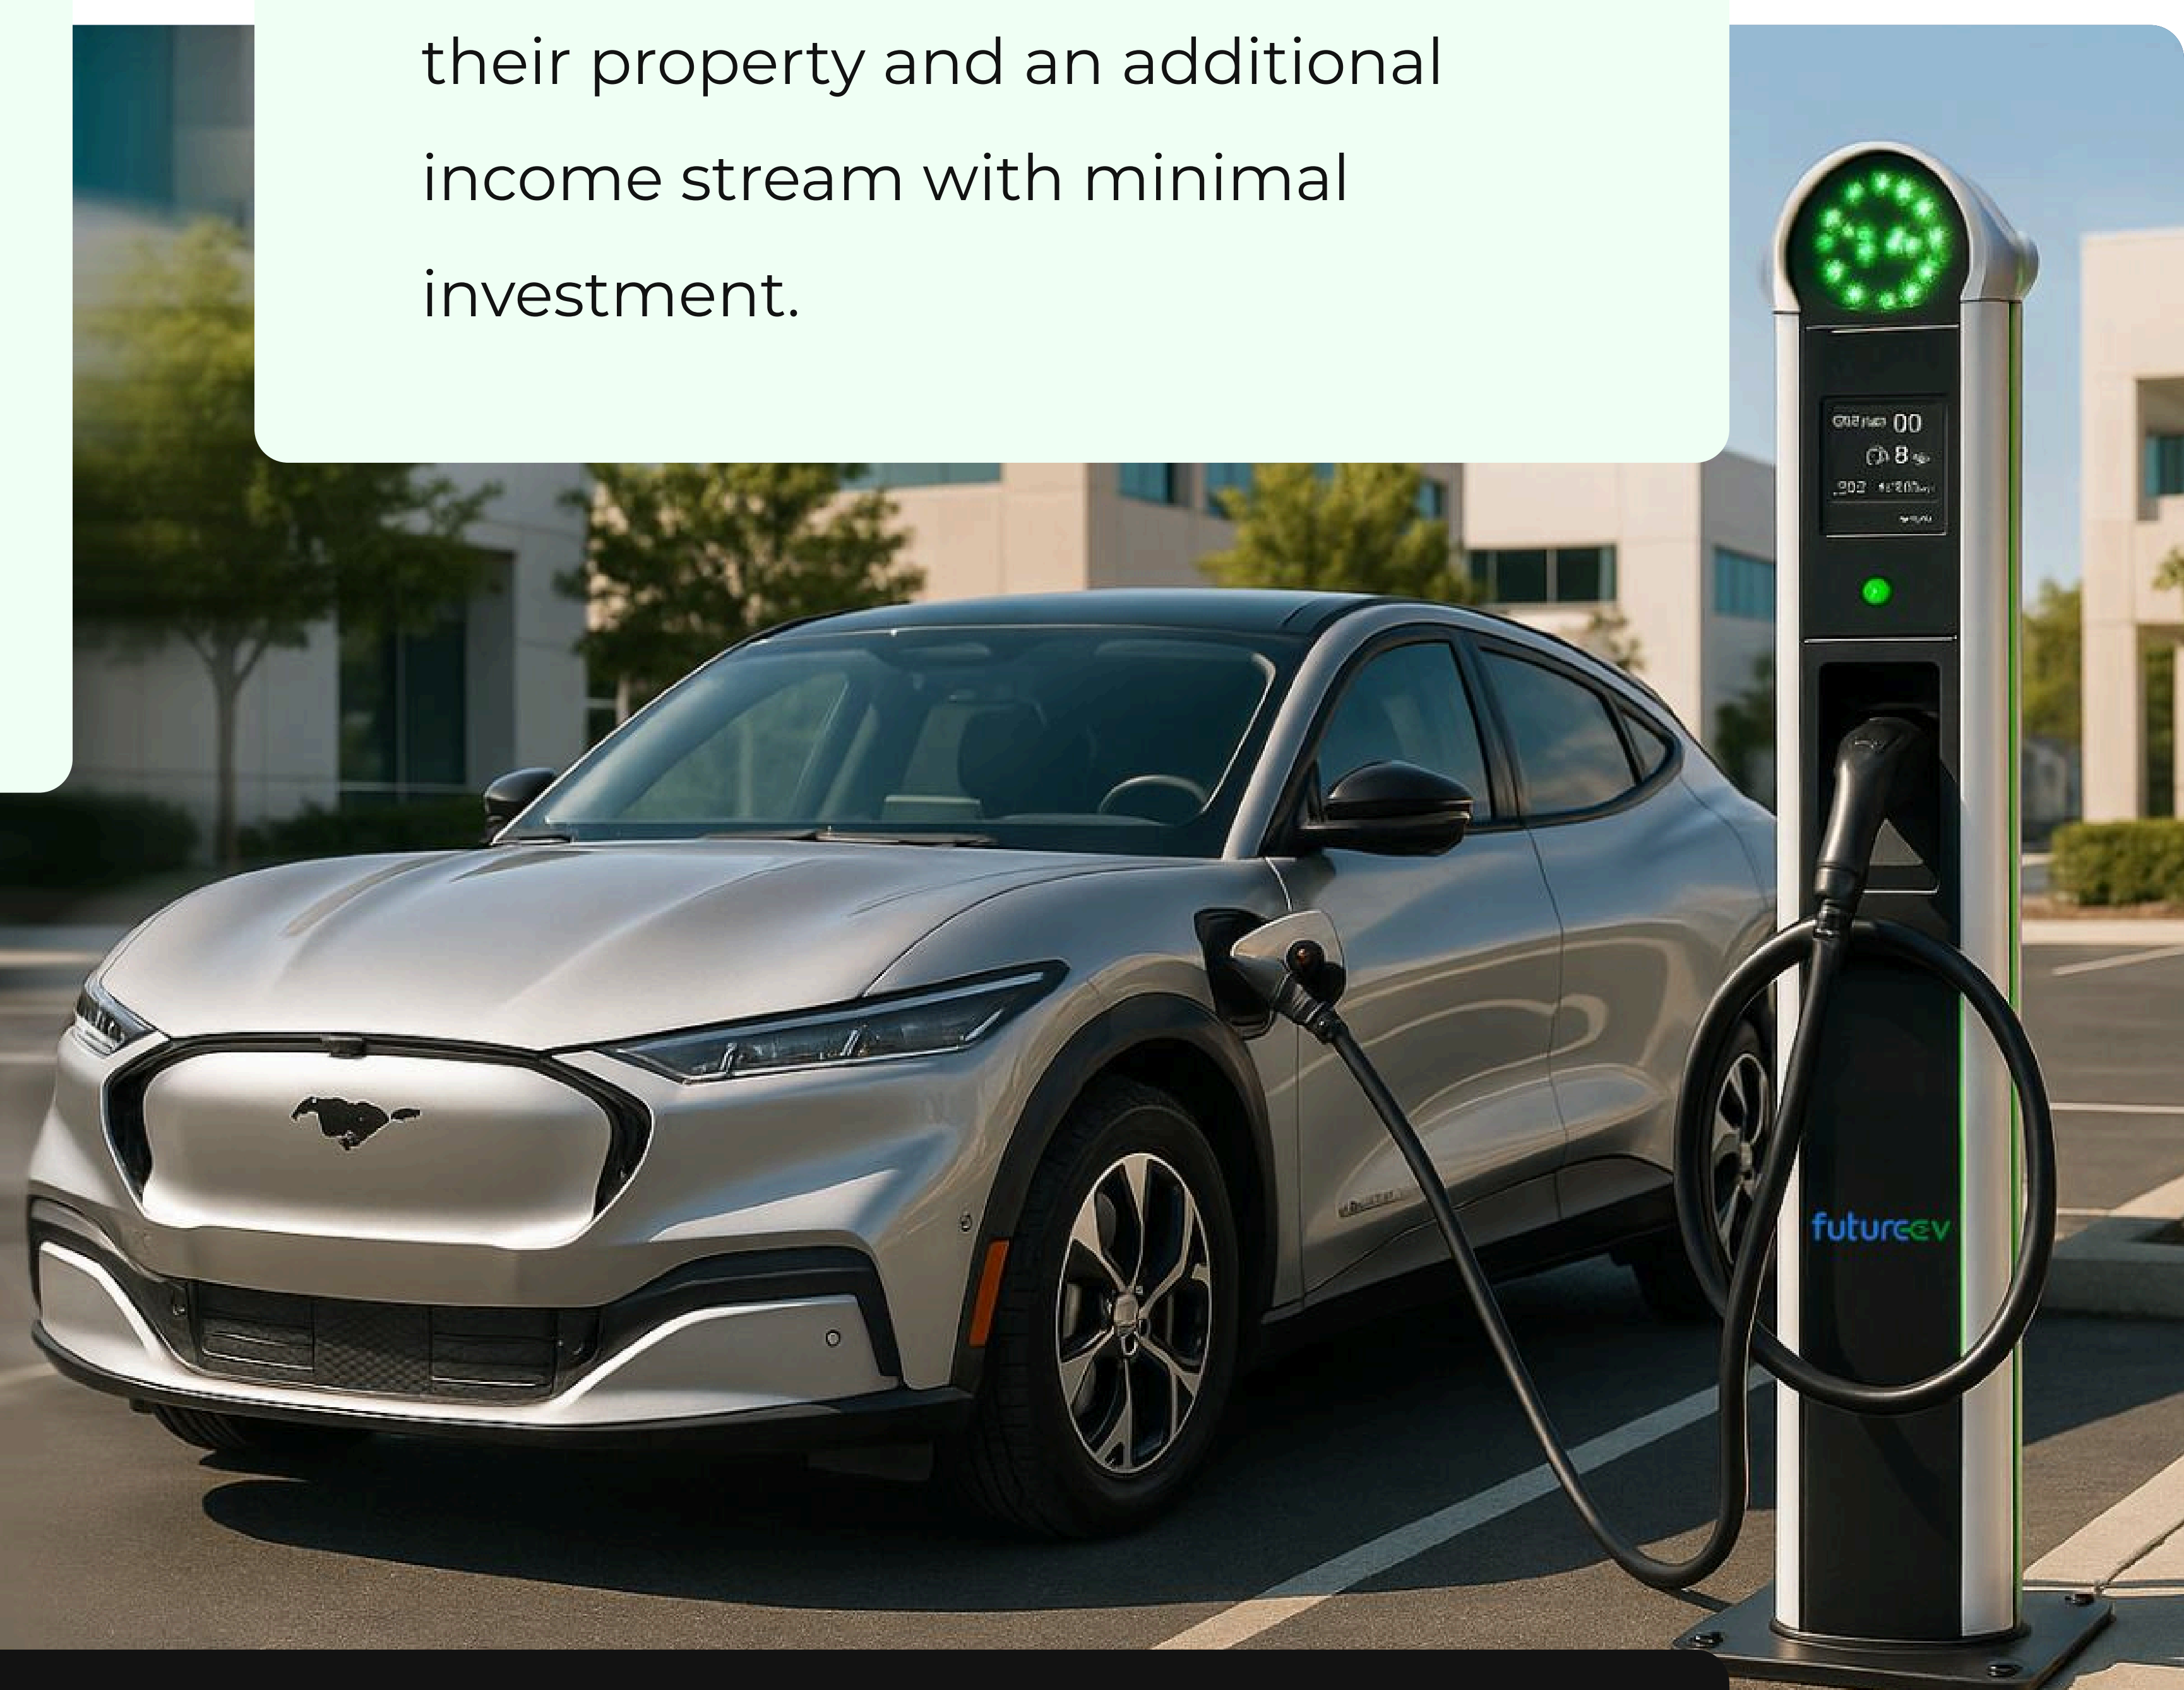

- A combination of low-cost and full investment models.
- Designed to balance client contribution with shared benefits.
- The perfect choice for clients seeking a middle ground in financial participation.

Leasing Solution

- We offer leasing plans tailored to each location and charging station type.
- Flexible terms designed to fit specific client needs.
- A practical alternative for clients who prefer leasing instead of direct purchase or investment.

Low to No-Cost Solution

- FutureEV covers the upfront investment and manages the entire project.
- We handle all charger maintenance and operations.
- A revenue-sharing model designed to benefit both parties.
- We apply for and manage all available incentives.
- Clients gain a valuable amenity for their property and an additional income stream with minimal investment.

OUR PROCESS

1

Initial Assessment

Site Identification: We select the locations with the highest potential for EV charging stations.

Feasibility Analysis: We carry out a detailed evaluation to ensure each site meets technical and regulatory requirements.

2

Preparation and Planning

On-Site Inspection: We visit the location to evaluate details and plan the installation of charging stations.

Tailored Proposal: Together with the client, we design a solution adapted to the specific conditions and requirements of the site.

3

Agreement and compliance

Contract: We finalize agreements with property owners to launch the project.

Incentive Management: We handle the process to secure all available benefits.

Permits & Compliance: We take care of meeting all necessary legal and regulatory requirements.

4

Implementation

Installation: We set up charging stations quickly and efficiently.

Configuration & Testing: Each unit is adjusted and tested to ensure full operational readiness from day one.

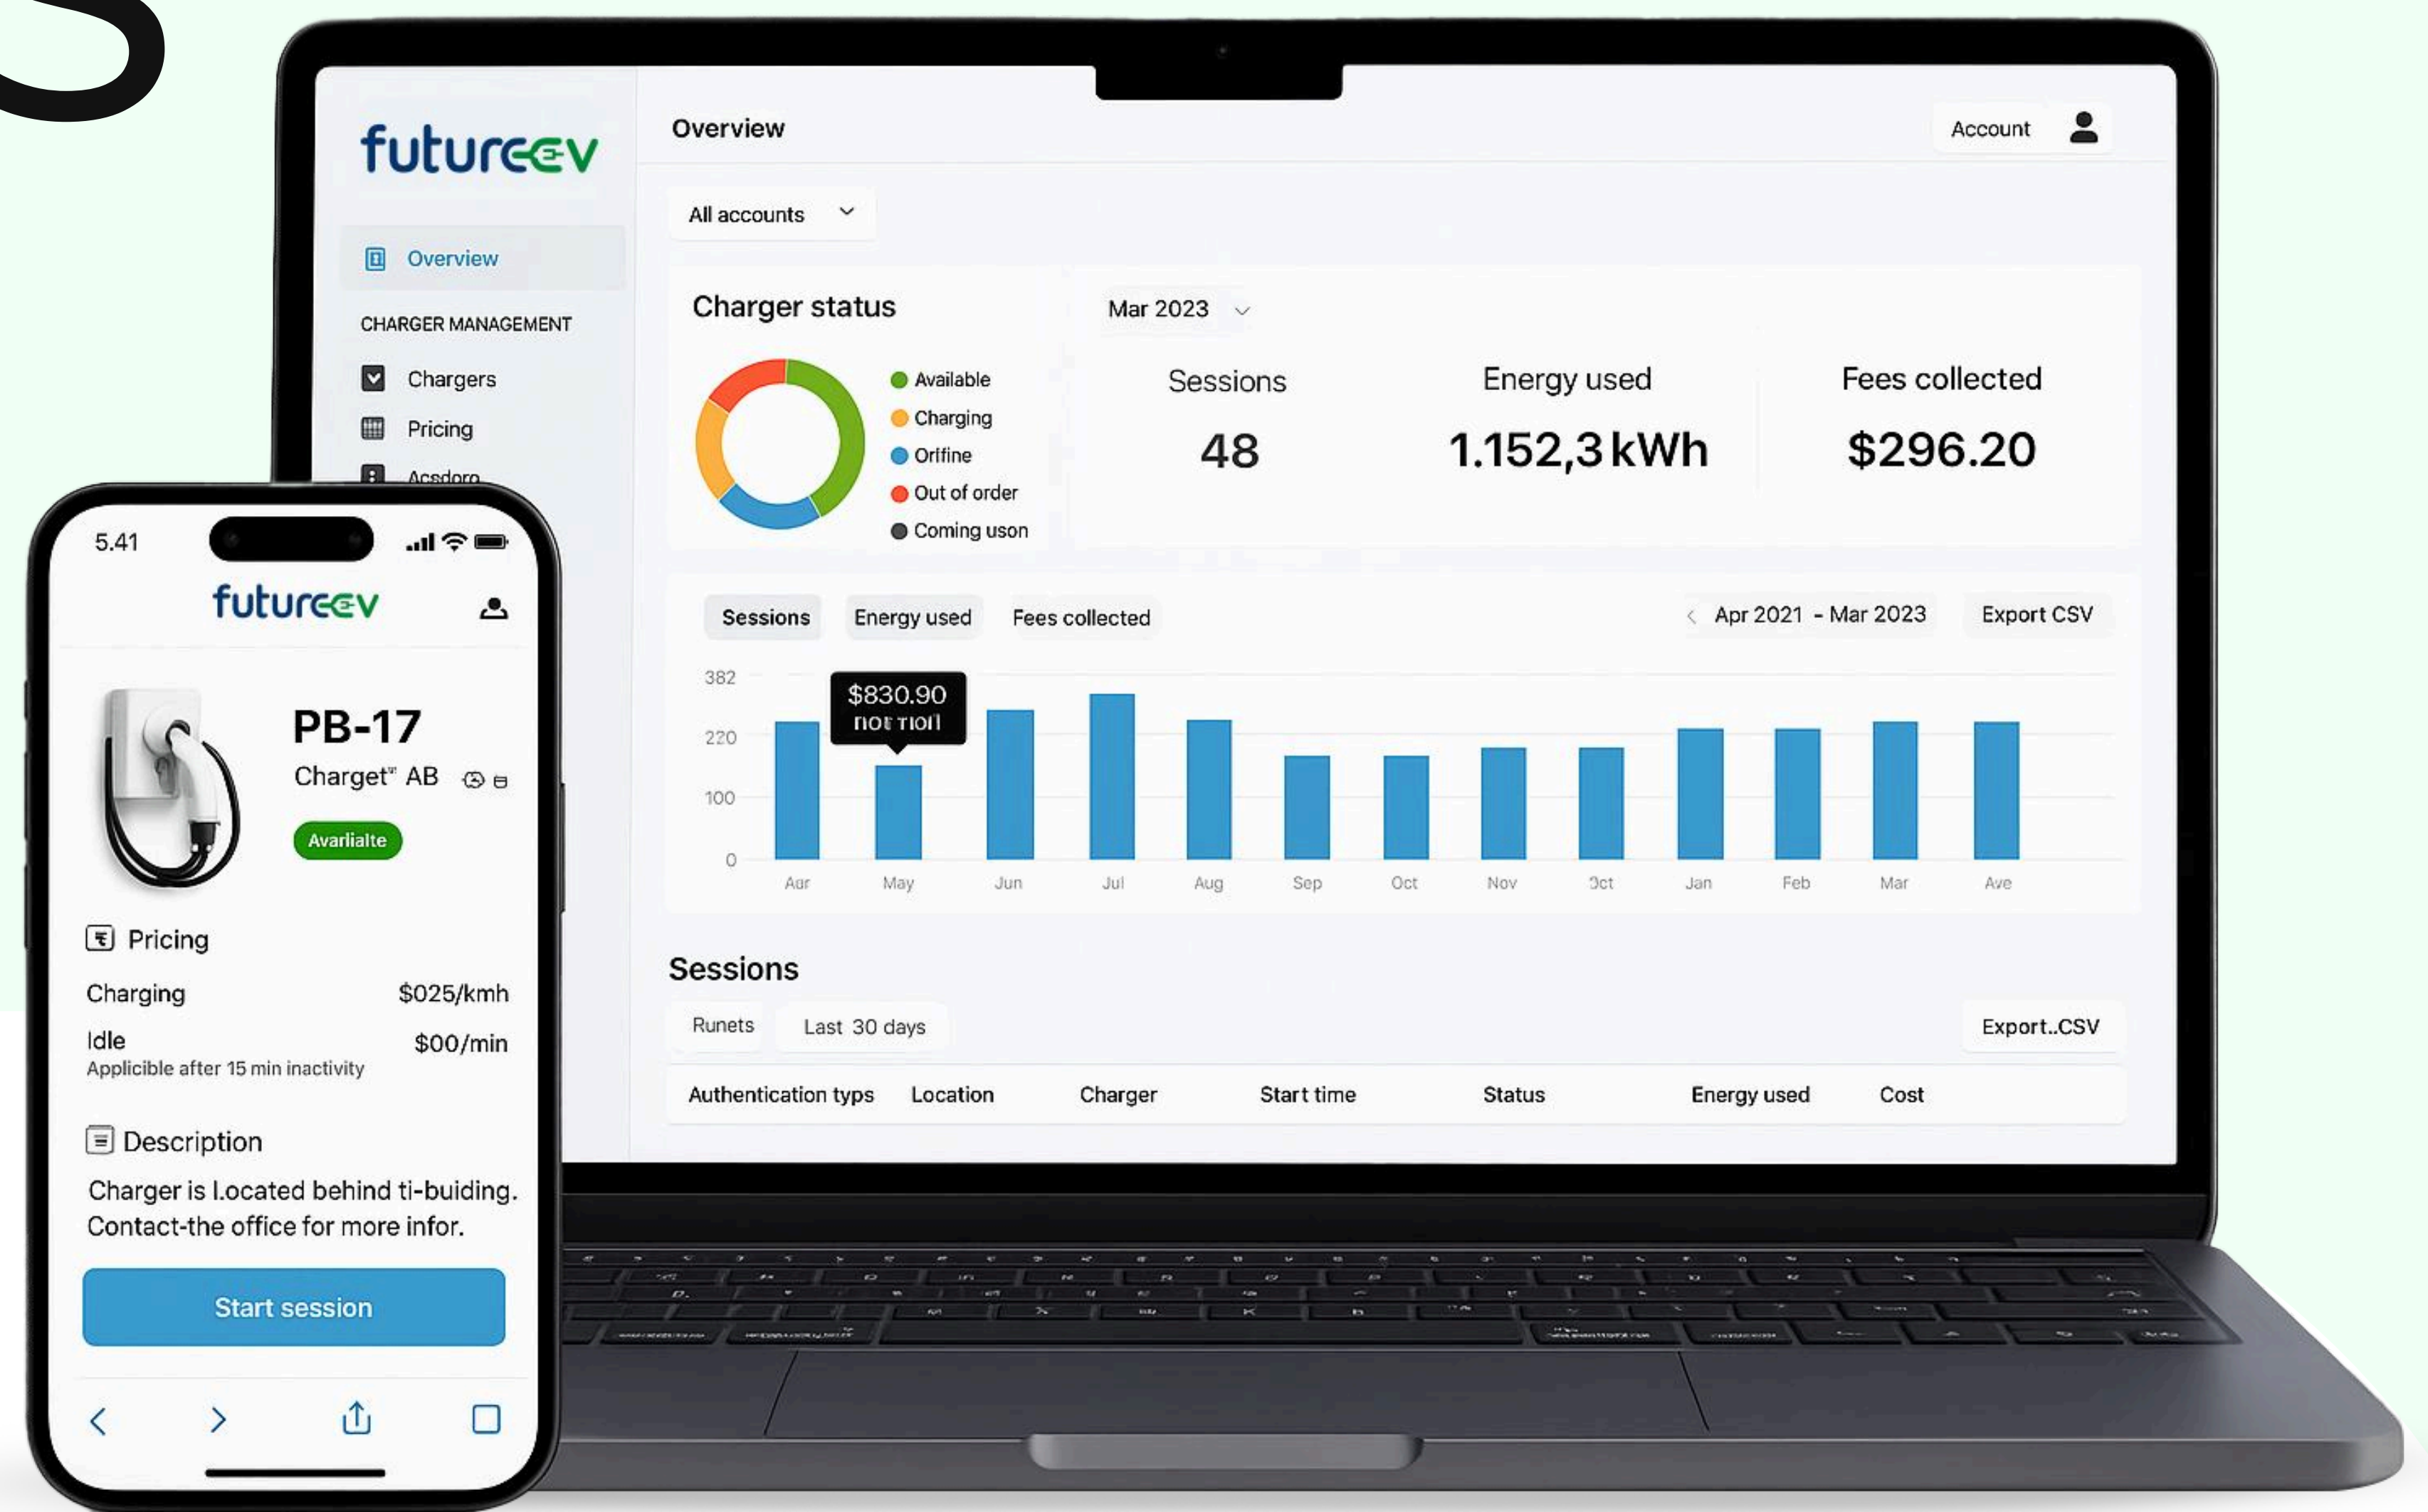

5

Ongoing Support

Maintenance & Management: We provide ongoing support to ensure charging stations operate smoothly at all times.

Revenue Optimization: We use market insights and analytics to refine pricing strategies and maximize profitability.

futureEV OWNERS PORTAL

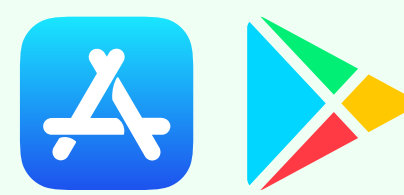

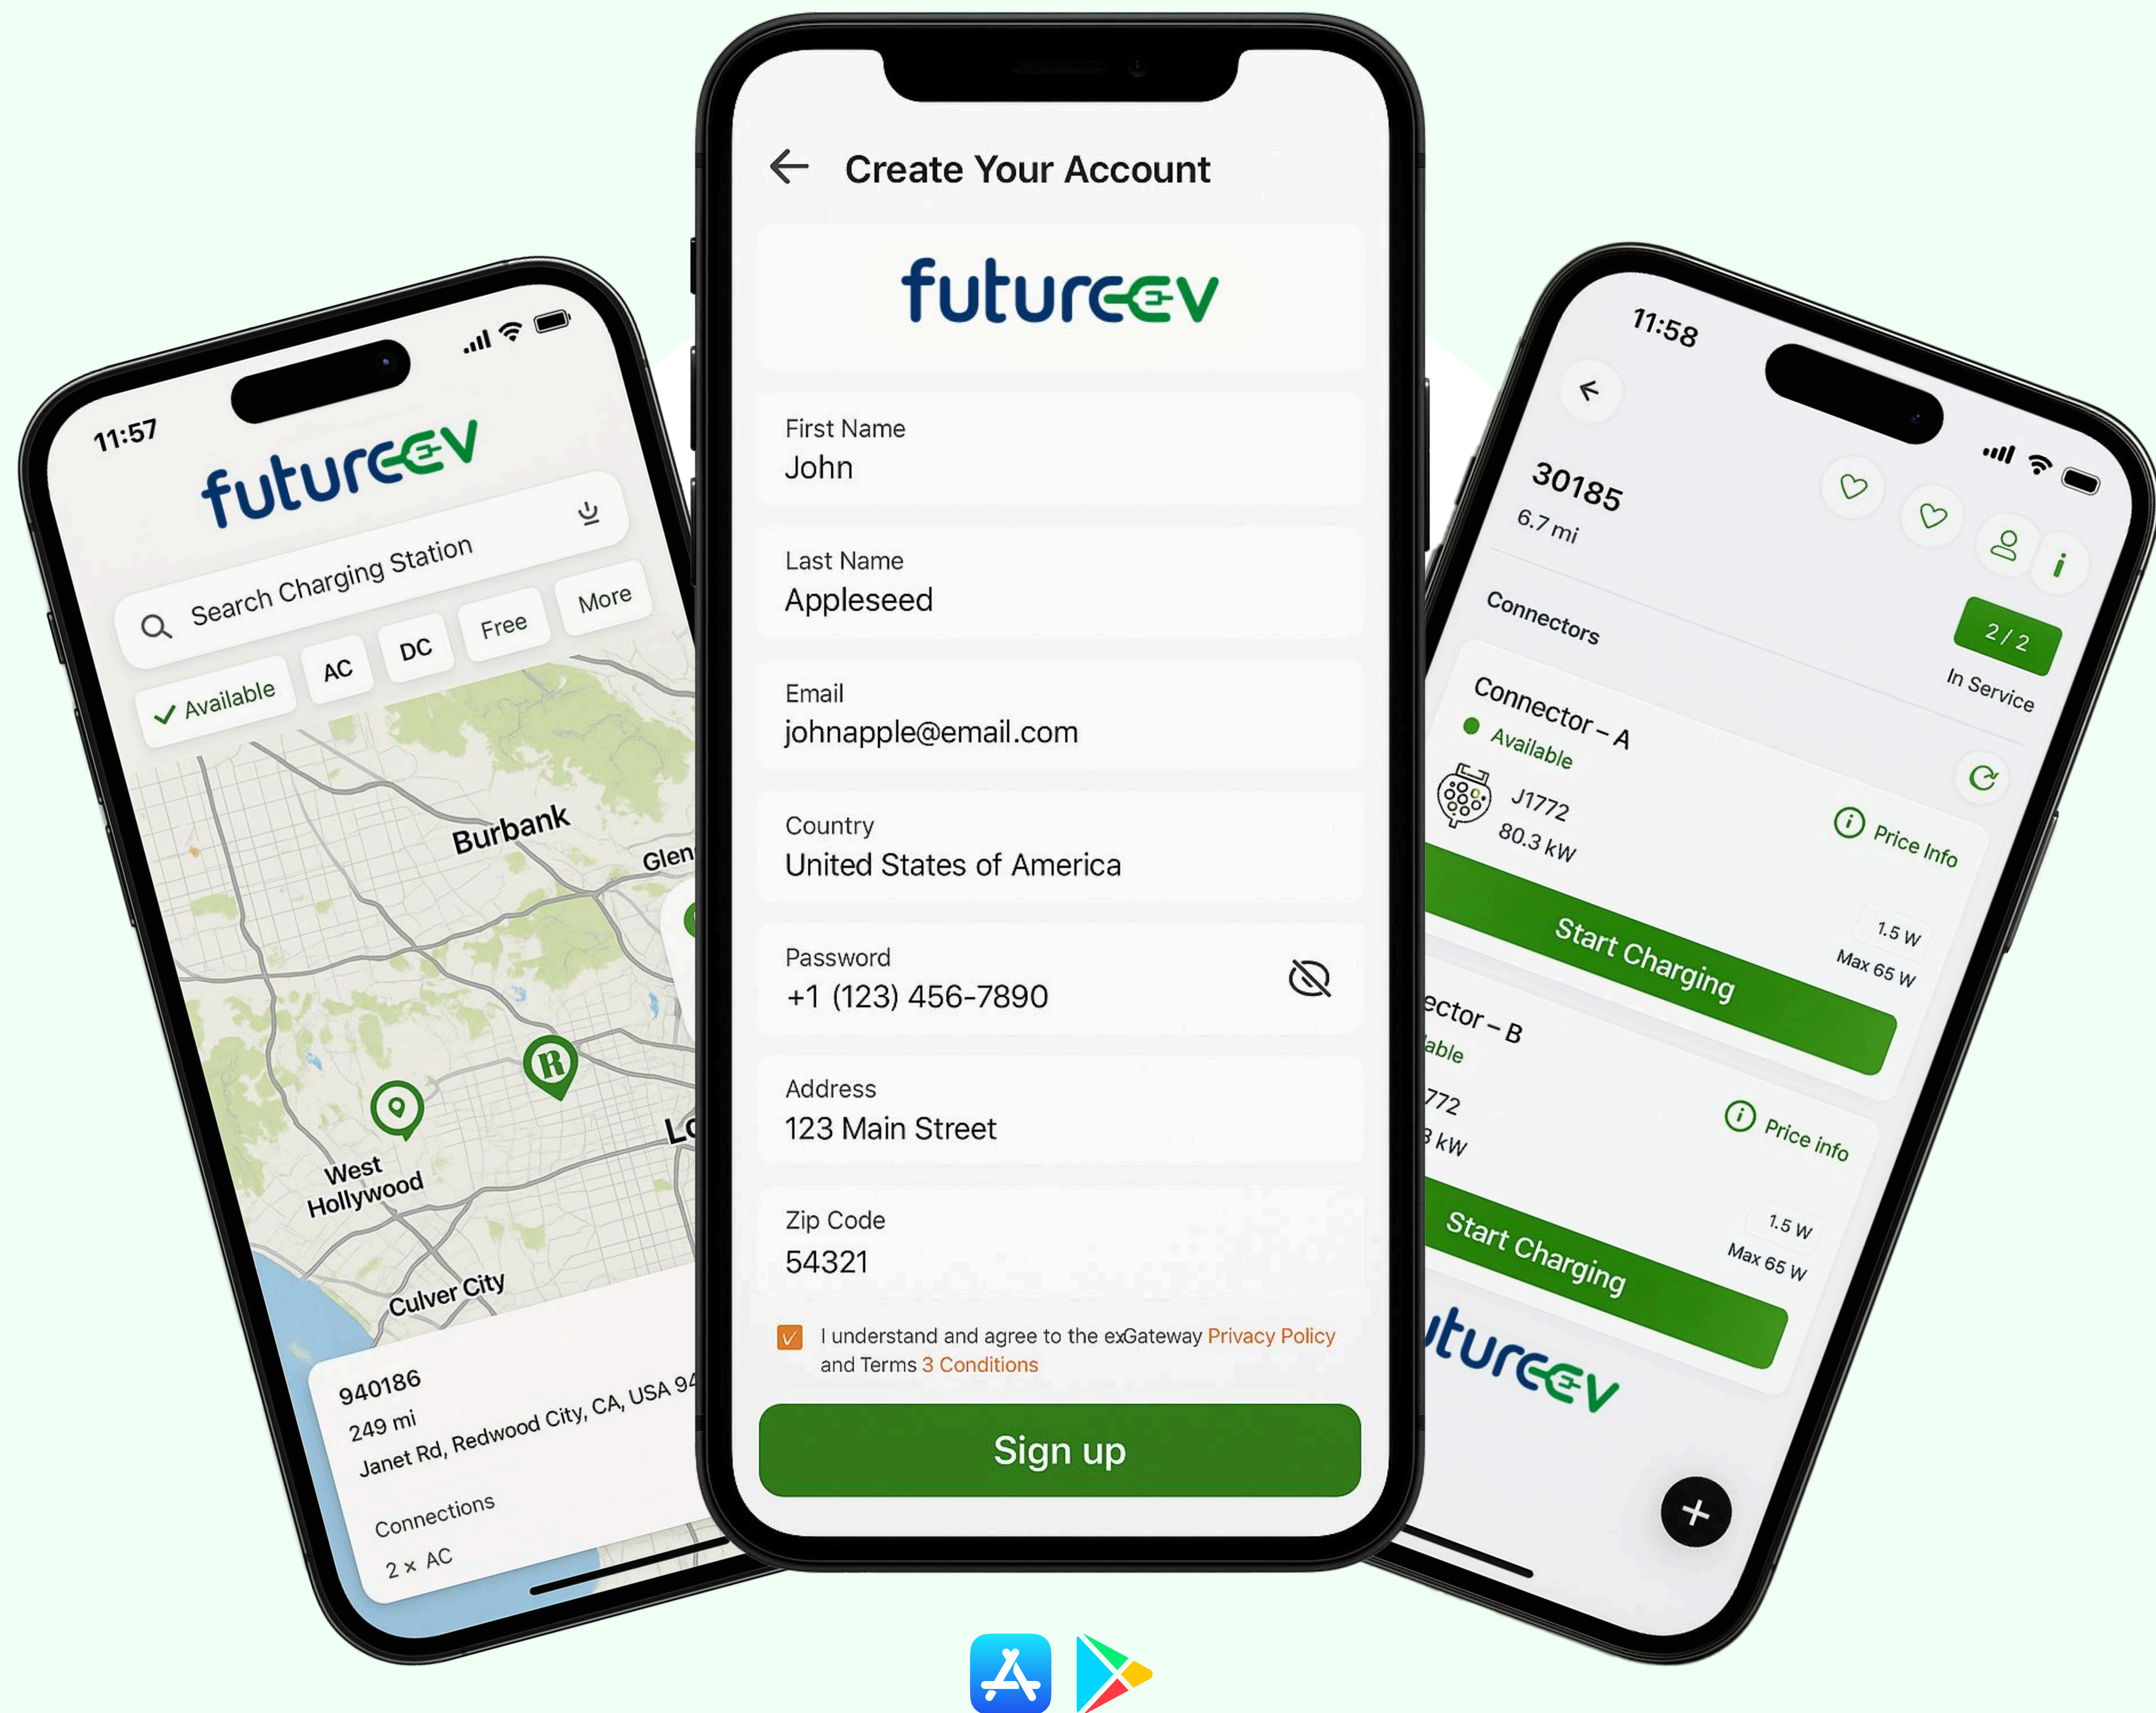

- **Charging Usage Analytics:** Access detailed reports on energy consumption.
- **Driver Management:** Customize access, pricing, and usage settings.

- **User Control:** Easily manage and edit user profiles.
- **Station Settings:** Add or adjust charger and plug configurations.
- **Instant Remote Support:** OCPP-based assistance for quick issue resolution.
- **Comprehensive Reports:** Clear access to financial and usage data.
- **24/7 Support:** Always available for administrative assistance.
- **Smart Load Management:** Efficient distribution of power across charging stations.

futureEV
